First read in the configuration of the scanner.

Open device window, by highlight the S3000(H), right mouse click, Open device window.

Highlight cases, to select the case you want to modify double click on it.
Select tab S3000(H) on the bottom of this page is the multiple sampling.

Highlight the down arrow and select the sampling rate you want to set for this case.

Repeat this for all of the monitoring cases in the project.
