**PLS to S3000 Upgrade**

If it is a stand alone PLS 101 312 then use the following

- 1028934 S3000 short range standard
- 2048602 - PLS to S3000 adapter cable
- 6034574 configuration cable USB to 4 pin M8.

You will have to configure the S3000 using CDS software.

If you have the PLS 101-xxx on an LSI interface then we need to see the wiring diagram and configuration.
