M4000 Muting Arm Kits

The perfect pre-mounted and pre-aligned solution for all standard muting applications

The M4000 Muting Arm Kits are pre-mounted and pre-aligned already to match all the existing standard muting applications. They are conceived for those muting applications which have not enaugh space for alternatives like device columns, especially.

The design keeps it simple to mount the Muting Arms into the M4000 device profiles' grooves, directly. The easy fastening by rhombus sliding nuts guarantee as high as flexibility in four different directions (up, down, turning left and right). These features are essential for an easy initial commissioning and if necessary, flexible post-adjustment, too.

At this, all the pre-mounted and pre-aligned muting sensors for 2 sensors crossed as well as 4 sensors parallel muting are able to be fitted into the best way to solve the relevant application.

The muting system consists of two main parts – the active sensor arm and the passive one. The wiring of the passive side is not required. This, in case of installation saves time and money.

Sensor Intelligence.

Applications

Access protection with Entry/Exit systems in branches like:
- Palletizers/depalletizers
- Storage and conveyor technology
- Packaging industry
- Automotive industry
- Robot Stations

Product features

Pre-mounted Muting Arm Kits for M4000 device profiles as well as device columns with 2 external mounting grooves
- Pre-mounted versions available for:
  - 4 sensors parallel muting
  - 2 sensors crossed muting
- High flexibility in x, y, z directions
- Safe, easy and fast mounting via rhombus sliding nuts
- Wiring of passive side not required

Delivery

Order no	Type	Delivery
2046171	2 sensors crossed muting	• 2 x muting arm active, 2 x GL6G-P1211 pre-mounted together with M12 angled plug and 2 m cable • 2 x muting arm passive, 2 x reflector P250 pre-mounted
2046170	4 sensors parallel muting	• 2 x Muting arm active, 4 x GL6G-P1211 pre-mounted together with M12 angled plug and 2 m cable • 2 x muting arm passive, 4 x reflector P250 pre-mounted
