FLUID SENSORS AT SICK

Optimized control of process parameters is the main driver for increasing efficiency and reducing input of valuable resources. Whether it’s pressure measurement, temperature measurement, level control or flow metering – SICK offers a wide range of solutions for measuring process variables for liquids, gases and bulk solids and protecting against overfill and dry run. SICK devices are rugged and easy to use. Innovative sensor technology enables accurate, universal measurement independent of material type.

Intelligent solutions for level and point level measurement

Whether for continuous level measurement, point level measurement or both – SICK offers a wide range of solutions for process engineering, storage and protection. Depending on the installation, characteristics of the liquid or solid, and ambient conditions, SICK provides a comprehensive product portfolio and a high level of expertise for more efficient processing.

Universal pressure measurement for liquids and gases

SICK’s portfolio of electronic pressure transmitters and switches can be optimally adapted to individual customer’s requests thanks to its intelligent and versatile configuration possibilities. Typical of all solutions from SICK is the use of high-quality materials, robustness and precise measurement technology, in addition to being easy to operate and install.

Universal temperature measurement for liquids and gases

With its product portfolio of screw-in and insertion thermometers as well as temperature switches, SICK offers high-quality solutions for contact temperature measurement in liquids and gases. The devices can optimally be adapted to meet individual requirements due to their various insertion lengths and the flexible mechanical configuration possibilities.

Robust and precise – flow measurement technology from SICK

SICK provides innovative sensor solutions for flow measurement technology which combine flexible measuring methods and robust equipment design with cost-efficient connection concepts for higher-order systems. Whether you need to detect the current flow rate using analog values or find the quantity using pulse detection – SICK’s flow sensors are always reliable and safe for a wide range of media and under difficult process and ambient conditions.
Measurement of pressure plays a central role in many areas of plant and mechanical engineering, the manufacturing industry, machine tooling, process engineering and the manufacture and processing of food and beverages.

Control of workpiece clamping pressure with PBS with IO-Link

In CNC machines, the workpieces are often clamped hydraulically. Electronic pressure switches such as the PBS make sure that the correct clamping pressure is applied.

Benefits:
• Pressure switch, pressure transmitter and display in one device
• Quick product changeover through setpoint adjustment via IO-Link
• Ergonomic: Legible display, large buttons and turnable housing
• Rugged and reliable
• Various installation options

Efficient level and point level measurement technology

SICK’s innovative offering includes guided radar sensors (TDR), ultrasonic equipment, capacitive sensors, vibration principle devices and various optical technologies. With SICK, the focus is on the optimum solution for your application. To do so, we offer a broad sensor portfolio.

Level measurement with LFP Inox

LFP Inox detects the level of storage containers to maintain the correct supply to the filling machine. Besides the aseptic design, the most important feature of this solution is fast, precise measurement.

Benefits:
• Quick response time
• High reproducibility
• Hygienic design
• High IP69 enclosure rating
• Simple installation

Pressure measurement in liquids and gases

Measurement of pressure plays a central role in many areas of plant and mechanical engineering, the manufacturing industry, machine tooling, process engineering and the manufacture and processing of food and beverages.
Universal temperature measurement

Whether monitoring operating conditions or controlling sensitive processes, the reliable and accurate measurement of the temperature is of vital importance in many industry segments.

Temperature control of cooling lubricants with TSP

Temperature sensors are employed in many areas. One example is the machine tool industry. Reliability and long-term stability of the thermometers is mandatory for reliable machine operation. To guarantee high quality machining of the work piece, the cooling lubricant is temperature-controlled. The SICK screw-in thermometer TSP is well-suited to measure the temperature of the cooling lubricant.

Benefits:
- Reliable
- Small dimensions
- Simple installation
- Cost-saving

Flow and throughput measurement with modern technology

SICK’s flow meters combine innovative, real-time measurements based on ultrasonic and laser technology. These non-contact technologies are particularly ideal for their flexibility in a wide range of applications.

Bulkscan®

The Bulkscan®, a non-contact measuring device that detects the profile of bulk material on the conveyor belt. The belt speed and the bulk material profile are then used to calculate a volume flow. This can be used to generate a rule for optimum belt speed to ensure economic belt usage.

Benefit:
- Low-maintenance throughput measurement
- Flexible use
- Optimum belt usage
- Belt monitoring to reduce belt wear (Bulkscan® LMS511)

### At a glance

- Level sensor for fluids
- No mechanical moving parts
- Manually cutable and exchangeable probe or rope probe
- Resistant to deposit formation
- 3 in 1: combined display, analog output (acc. NAMUR NE 43) and binary output
- High enclosure rating of IP67, rotatable housing and remote amplifier version
- IO-Link

- Level monitoring in hygienic applications
- Manually cutable monoprobe with $Ra \leq 0.8 \mu m$
- CIP/SIP resistant
- High enclosure rating IP67 and IP69, autoclavable
- Interchangeable hygienic process connections
- 3 in 1: combined display, analog output and binary output
- Remote amplifier version with compact process connection
- IO-Link

- Continuous level measurement and temperature measurement as well as level and temperature switches
- Measurement irrespective of container material
- Probe from 100 mm to 1,000 mm
- Display and intuitive menu navigation
- No mechanical moving parts
- IP67 enclosure rating and IO-Link 1.1
- No dead zone along the measuring range

- Chemical resistance

**Switching output for monitoring the maximum and minimum limit**
- Robust level monitoring in liquid without additional requirements
- Small, compact design; no medium calibration required
- Process temperature up to 55 °C, process pressure up to 16 bar
- IP67 and IP69K enclosure rating
- Process connection G ½
- Highly medium resistant due to stainless steel housing 1.4404, polysulfone apex
- Output available as PNP or NPN transistor
- FDA-compliant, UL

**Remote amplifier version**
- Analog output switchable between 4 mA to 20 mA and 0 V to 10 V
- Different sizes available
- Analog output selectable between 4 mA to 20 mA and 0 V to 10 V
- Switching output for monitoring the maximum and minimum limit

**IP67 enclosure rating**
- G 2
- Process connector thread G 1 and G 2
- Different sizes available
- Analog output switchable between 4 mA to 20 mA and 0 V to 10 V
- Switching output for monitoring the maximum and minimum limit

**UP56**
- Non-contact level measurement up to 3.4 m operating distance / 8.0 m limit scanning distance
- Pressure resistant up to 6 bar (87 psi)
- Transducer protected by PVDF cover for increased resistance
- 3 in 1: continuous level measurement, level switch and display
- Analog output switchable between 4 mA ... 20 mA and 0 V ... 10 V
- Process connector thread G 1 and G 2
- IP67 enclosure rating
- Easy to set parameters, also via connect+

**UP56 Pure**
- Ultrasonic level sensor with very high chemical resistance
- Non-contact measurement in immersion pipe of up to 1,500 mm
- PTFE-coated membrane and GF D40 process connection made of PTFE
- Pressure resistant up to 6 bar, temperature resistant up to 85°C
- Different sizes available
- Analog output selectable between 4 mA to 20 mA and 0 V to 10 V
- Switching output for monitoring the maximum and minimum limit

**MHF15**
- Robust level monitoring in liquid without additional requirements
- Small, compact design; no medium calibration required
- Process temperature up to 55 °C, process pressure up to 16 bar
- IP67 and IP69K enclosure rating
- Process connection G ½
- Highly medium resistant due to stainless steel housing 1.4404, polysulfone apex
- Output available as PNP or NPN transistor
- FDA-compliant, UL

#### Key features:

- A large variety of available process connections
- No moving parts: No mechanical wear, fatigue-proof, maintenance-free
- Circularly welded, hermetically sealed stainless steel membrane
- Electrical connection M12 x 1, L-connector acc. to DIN 175301-803 A or flying leads
- Compact pressure switch for industry
- Universal pressure switch
- Wetted parts made from high-quality stainless steel
- Large range of hygienic process connections
- Stainless steel housing with enclosure rating of up to IP68
- Various output signals and electrical connections available
- Common process connections available
- High overpressure safety. Pressure peak protection available upon request for selected process connections.
- Circularly welded, hermetically sealed stainless steel membrane
- Stainless steel housing with enclosure rating up to IP67

### Wetted parts

- Made from corrosion-resistant stainless steel 316L/1.4435, R0.8 µm
- Various mechanical adaptations and insertion lengths
- Various insertion lengths

### IP rating

- Enclosure rating: IP65 and IP67
- Cable gland: M16 x 1.5, IP65, L-connector IP67 (DIN EN 175301-803 A)
## Temperature sensors

### Technical data overview

- **Accuracy of sensor element:** ≤ ± (0.15 °C + 0.002 |t|) Class A according to IEC 60751
- **Measuring ranges:** –20 °C ... +80 °C, –50 °C ... +150 °C

### Signal outputs and maximum values

- **Transistor outputs:** PNP/NPN, IO-Link
- **Analog output:** 4 mA ... 20 mA or 0 V ... 10 V

### Interface

- **Round connector M12 x 1, 4-pin, IP67**
  - Pt100, 2-wire or Pt1000, 2-wire
  - Pt100, 3-wire or Pt1000, 3-wire

### Wetted parts

- **Made from:** Stainless steel 1.4305
  - Circular connector M12 x 1
  - Various hygienic connections and insertion lengths

### Additional features

- **Hygienic and flexible:** Hygienic temperature measurement
- **Efficient and space saving:** Temperature measurement

### Available models

- **TSP:** Efficient and space saving temperature measurement
- **THTS:** Simple, hygienic temperature measurement
- **THTL:** Hygienic and flexible: Temperature sensor with protection tube
- **THTL:** Perfect fit: Hygienic temperature measurement in pipes

SERVICES FOR MACHINES AND PLANTS: SICK LifeTime Services

Our comprehensive and versatile LifeTime Services are the perfect addition to the comprehensive range of products from SICK. The services range from product-independent consulting to traditional product services.

- **Consulting and design**
  Safe and professional

- **Product and system support**
  Reliable, fast, and on-site

- **Verification and optimization**
  Safe and regularly inspected

- **Upgrade and retrofits**
  Easy, safe, and economical

- **Training and education**
  Practical, focused, and professional
SICK AT A GLANCE

SICK is a leading manufacturer of intelligent sensors and sensor solutions for industrial applications. With more than 9,700 employees and over 50 subsidiaries and equity investments as well as numerous agencies worldwide, SICK is always close to its customers. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents, and preventing damage to the environment.

SICK has extensive experience in various industries and understands their processes and requirements. With intelligent sensors, SICK delivers exactly what the customers need. In application centers in Europe, Asia, and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes SICK a reliable supplier and development partner.

Comprehensive services round out the offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

That is “Sensor Intelligence.”

Worldwide presence:

Australia, Austria, Belgium, Brazil, Canada, Chile, China, Czech Republic, Denmark, Finland, France, Germany, Great Britain, Hungary, Hong Kong, India, Israel, Italy, Japan, Malaysia, Mexico, Netherlands, New Zealand, Norway, Poland, Romania, Russia, Singapore, Slovakia, Slovenia, South Africa, South Korea, Spain, Sweden, Switzerland, Taiwan, Thailand, Turkey, United Arab Emirates, USA, Vietnam.
