END-TO-END SAFETY FOR AUTOMATED GUIDED VEHICLE SYSTEMS

✓ Modular expansion possible

✓ Economical

✓ Easy to integrate

✓ Gapless safety

✓ Complies with international standards

✓ Future-proof

Safe AGV Easy is the comprehensive end-to-end safety solution for automated guided vehicles and transport carts (AGVs and AGCs). The functional safety system implements the safety functions for collision avoidance and works reliably even under difficult ambient conditions such as dust. Integration is quick and easy because the Safe AGV Easy consists of tried-and-tested components in a compact design.

Safe AGV Easy primarily serves to protect employees, but also prevents damages to industrial vehicles or production machines. Compared to protection with bumpers, much higher speeds can be implemented with Safe AGV Easy. It is the easy and cost-effective solution for protecting your process and productivity in the long term.

SICK offers a wide range of products for the protection of automated guided vehicles and transport carts (AGVs and AGCs). Safe AGV Easy combines the most important products with a range of decisive advantages.

Safe AGV Easy is economical, easy to integrate and allows for modular expansion

With small transport vehicles and transport carts in particular, it is important to keep track of both the costs and the size of the safety solution. Safe AGV Easy consists of a safety laser scanner and a Flexi Classic safety controller or a safety relay. The system can also be easily mounted and expanded in the transport vehicle even if space is tight. Safe AGV Easy is therefore the right safety solution for any automated guided vehicle.

Safe AGV Easy offers end-to-end safety

The tried-and-tested safety components of the Safe AGV Easy ensure end-to-end safety of automated guided vehicles and transport carts. The safety laser scanner, combined with the Flexi Classic safety controller or a safety relay, detects people and objects in the path of the vehicle even under challenging application conditions, thereby reliably preventing collisions.

Safe AGV Easy fulfils international standards

The standards for safety solutions in automated guided vehicles vary from country to country. Due to international business relationships, increasing standardization and the strengthening of standards, however, requirements can grow quickly. With Safe AGV Easy, you are already on the safe side - the system consists of tried-and-tested and completely safe components which will also fulfill upcoming standards for modern safety systems.

Benefits at a glance

- ✓ Complete safety solution for automated guided vehicles and transport carts (AGVs and AGCs)
- ✓ Easy to integrate – consists of safety laser scanners and safety controller or safety relay in a compact design
- ✓ Can be used anywhere – flexible application due to expandable functions
- ✓ High reliability - even under difficult application conditions
- ✓ Reliable detection of people and obstacles located in the path of the vehicle

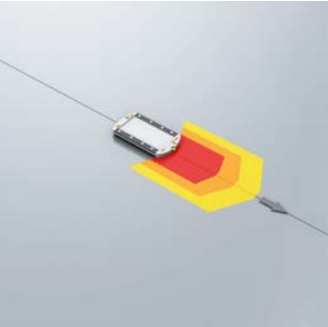

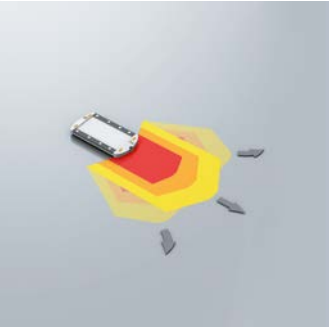

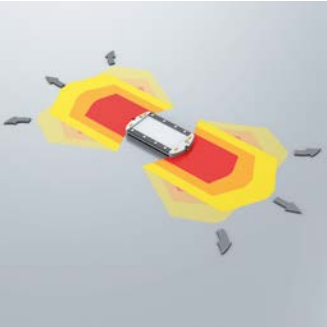

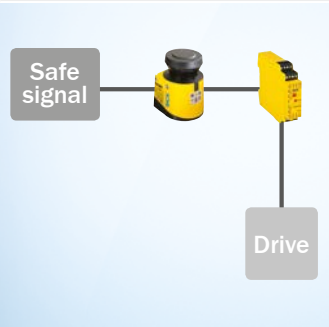

Safe AGV Easy OFFERS EXPANDABLE APPLICATION PACKAGES

A modular and application-specific solution package is available from Safe AGV Easy for applications which require different directions of travel, quick cornering or AGV docking processes. This way you only invest in the components you need. And should your requirements change, the Safe AGV Easy can be expanded flexibly at any time. This secures your investment and keeps your processes running.

Safe AGV Easy is available in three variants. All are easy to integrate and offer reliable protection thanks to tried-and-tested safety components.
