PRODUCT OVERVIEW

OPTO-ELECTRONIC PROTECTIVE DEVICES

PRODUCTS AT A GLANCE (ASIA VERSION)

Safety laser scanners, safety light curtains, safety camera systems, multiple light beam safety devices, single-beam photoelectric safety switches, mirror columns and device columns

SICK
Sensor Intelligence.

OPTO-ELECTRONIC PROTECTIVE DEVICES

Opto-electronic protective devices from SICK are the first choice for maximum machine and system productivity. Unlike fences and doors, they do not disrupt handling or material transport and allow a better view into the machine room. SICK‘s comprehensive portfolio is ideal for hazardous point protection, access protection, and hazardous area protection. The SICK’s proprietary interface, EFI, offers additional process optimization.

General information 3

Safety laser scanners 8
S300 Mini, S300, microScan3, S3000

Safety light curtains 14
deTec4, deTec2, miniTwin, mac4, C4000, C2000

Safety camera systems 19
V200, V300

Multiple light beam safety devices 20
M4000, M2000

Single-beam photoelectric safety switches 24
WSU/WEU, L4000, L2000

Mirror columns and device columns 26
Mirror columns, device columns

Applications

Whether for persons, machines or other objects, in automated production and logistics processes, safety is the highest priority. For decades, SICK has been producing pioneering products for the protection of hazardous areas and hazardous points as well as for access protection.

Use our Safety Solution assistant. It guides you from your safety task to a product recommendation for safety sensors and safe control solutions.

➜ www.sick.com/safetyplus-safety-solution-assisant

Hazardous point protection with finger or hand detection

The worker works very close to the hazardous point of the machine here. The stopping time is very short. With a detection capability of 14 mm, individual fingers are reliably detected.

Benefits

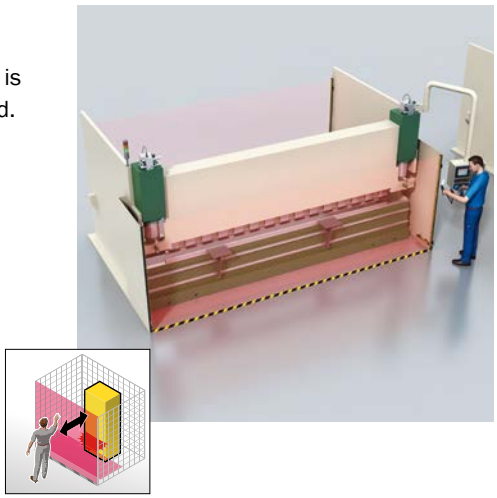
- Enables very frequent operator/machine interaction and an unimpeded view
- The distance to the hazardous point is reduced to a minimum
- Supports high productivity

Hazardous point protection with hand and person detection

The worker works close to the hazardous point of the machine. The stopping time is very short. With a detection capability of up to 40 mm, hands are reliably detected.

Benefits

- Enables unrestricted access, frequent interaction and an unimpeded view into the machine
- With presence detection, automatic restart can be initiated

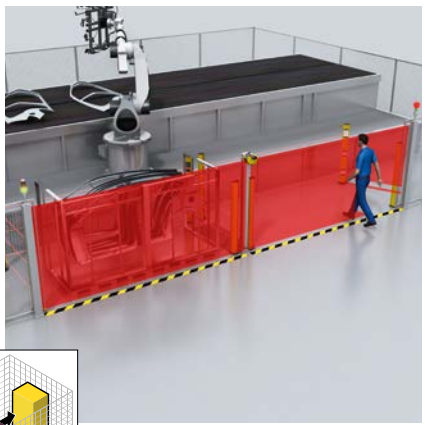


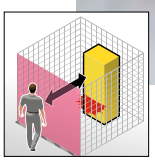
One-sided access protection with person detection

The worker interacts with the machine regularly, but not frequently.
Safety laser scanners or multiple-beam systems reliably detect persons when entering a hazardous area.

Benefits

- Enables unrestricted access and an unimpeded view into the machine



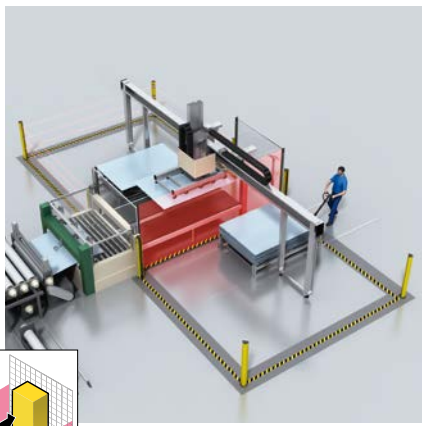


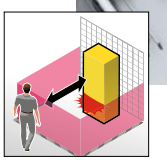
Multi-sided access protection with person detection

The worker interacts with the machine regularly, but not frequently.
Safety laser scanners or multiple-beam systems detect a person entering the hazardous area from several sides.

Benefits

- Enables unrestricted access to the machine from several sides and an unimpeded view into the machine





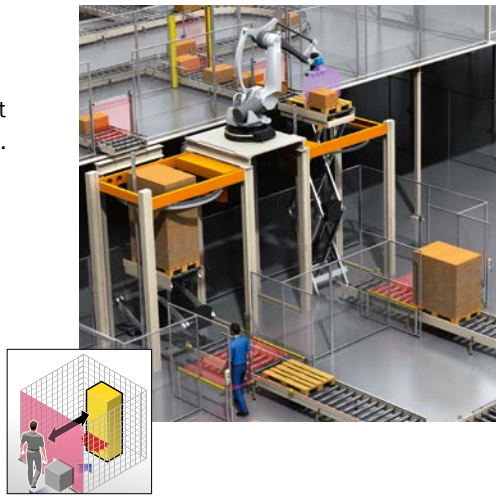
8020738/2016-12-15
Subject to change without notice

One-sided access protection with differentiation between persons and material

For muting, entry/exit monitoring and machines with automatic material transport systems. Safety laser scanners or multiple-beam systems reliably detect persons.

Benefits

- Unimpeded material transport supports high productivity

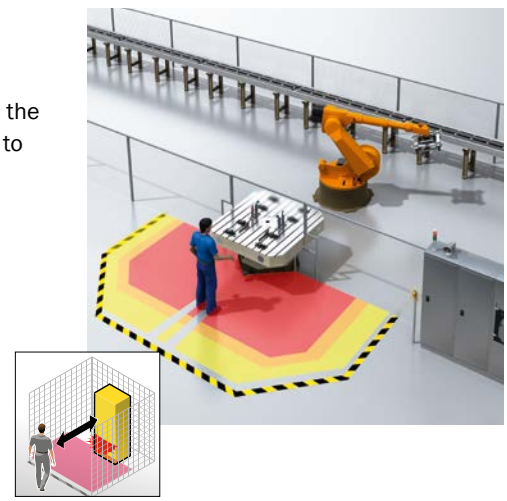


Stationary hazardous area protection with person detection in the presence

The worker interacts with the machine regularly, but not frequently. The view into the hazardous walk-through area can be restricted. With a detection capability of up to 70 mm and respective mounting height, human legs are reliably detected.

Benefits

- Combined approach and presence monitoring
- Enables unrestricted access to the machine

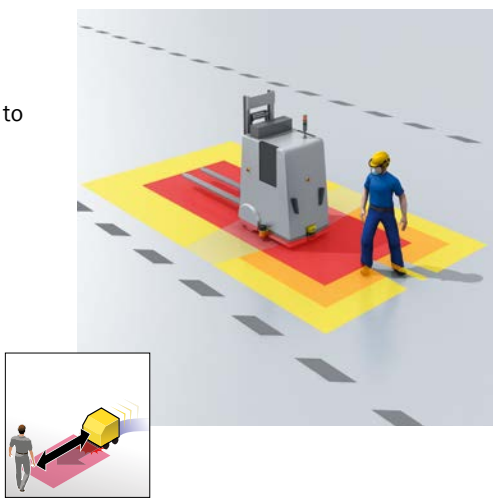


Mobile hazardous area protection with person detection when approaching

Protection of persons while vehicles are moving. With a detection capability of up to 70 mm and respective mounting height, human legs are reliably detected.

Benefits

- Reduced downtimes and wear caused by frequent braking
- The minimum distance can be automatically adjusted to the speed



AN OVERVIEW OF THE MOST IMPORTANT PROPERTIES OF OPTO-ELECTRONIC PROTECTIVE DEVICES

	Safety laser scanners			
	 S300 MINI + EFI GERÄT	 S300	 micro-Scan3	 S3000
	Ultra-compact - focused on the essentials	Compact - all functions in a single device	The new generation of safety laser scanners	Powerful and modular
Protective field range The protective field range describes the maximum range of the monitored field.	 Range up to 3 m (0, 3, 7)	 Range up to 3 m (0, 3, 7)	 Range up to 5.5 m (0, 5.5, 7)	 Range up to 7 m (0, 7)
Scanning angle The scanning angle describes the maximum viewing angle of the scanner.	 Angle 270°	 Angle 270°	 Angle 275°	 Angle 190°
Fields The number of fields indicates how flexibly the scanner can be adapted to different process phases.	 48 fields	 48 fields	 8 fields	 64 fields
Dimensions: **width x height x depth** The smaller the device, the simpler it is to integrate in a system.	 Size 102 mm x 116 mm x 104 mm	 Size 102 mm x 152 mm x 106 mm	 Size 112 mm × 135 mm × 111 mm	 Size 155 mm x 185 mm x 160 mm
Safety tasks				Detailed information	→ 8	→ 8	→ 9	→ 10

REGISTER AT WWW.SICK.COM TODAY AND ENJOY ALL THE BENEFITS

- ☑ Select products, accessories, documentation and software quickly and easily.
- ☑ Create, save and share personalized wish lists.
- ☑ View the net price and date of delivery for every product.
- ☑ Requests for quotation, ordering and delivery tracking made easy.
- ☑ Overview of all quotations and orders.
- ☑ Direct ordering: submit even very complex orders in moments.
- ☑ View the status of quotations and orders at any time. Receive e-mail notifications of status changes.
- ☑ Easily repeat previous orders.
- ☑ Conveniently export quotations and orders to work with your systems.

SERVICES FOR MACHINES AND SYSTEMS: SICK LifeTime Services

Our comprehensive and versatile LifeTime Services are the perfect addition to the comprehensive range of products from SICK. The services range from product-independent consulting to traditional product services.

Consulting and design
Safe and professional

Product and system support
Reliable, fast and on-site

Verification and optimization
Safe and regularly inspected

Upgrade and retrofits
Easy, safe and economical

Training and education
Practical, focused and professional

SICK AT A GLANCE

SICK is a leading manufacturer of intelligent sensors and sensor solutions for industrial applications. With more than 7,400 employees and over 50 subsidiaries and equity investments as well as numerous agencies worldwide, we are always close to our customers. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in various industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services round out our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is "Sensor Intelligence."

Worldwide presence:

Australia, Austria, Belgium, Brazil, Canada, Chile, China, Czech Republic, Denmark, Finland, France, Germany, Great Britain, Hungary, India, Israel, Italy, Japan, Malaysia, Mexico, Netherlands, New Zealand, Norway, Poland, Romania, Russia, Singapore, Slovakia, Slovenia, South Africa, South Korea, Spain, Sweden, Switzerland, Taiwan, Thailand, Turkey, United Arab Emirates, USA, Vietnam.
