SICK eBusiness – The benchmark for network solutions

Our eBusiness solutions allow you to network your purchasing process with SICK in order to save time and money. With eCatalog, eShop, or EDI solutions available, you can choose the level of automation to suit your needs.

To find out how eBusiness can help you to work more efficiently with SICK, speak to your contact person at SICK or call 0211 5301-301

The SICK website – turbo-powered searches for your day-to-day work

You will always find the right solution. The lightning-fast [intelligent search](#) presents results from all areas of the website in a clear and comprehensible manner. Or you can access the area you need directly. Whether you are looking for products, services, accessories, documentation, software, application examples, or industry solutions – the website navigation will take you straight to where you want to go.

The advanced search provides step-by-step support in the form of [functional filters](#) to help you find the right product for your application. Enter the desired features, such as sensing range, connection type, or type of light, and the search will display corresponding products from the entire SICK portfolio. The product comparison will help you make the right decision when faced with multiple products. Simply select a number of products or product families and the comparison function will display the differences in a clear and comprehensible manner.

The [product detail pages](#) provide information on technical data, free downloads such as data sheets, operating instructions, and CAD models, as well as product and application videos.

Search carried out, product found and straight in the shopping cart – place the items you want straight in the shopping cart and complete your order quickly and easily. Find out more about the many benefits of registering online →

eShop from SICK – save time and money when placing orders

Our eShop makes the ordering process easier than ever and helps you keep track of all of your orders – 24 hours a day!

The optional [status notification function](#) keeps you informed of the status of your order via e-mail, saving you the trouble of checking manually yourself.

The functional [wish lists](#) allow you to put together a list of products that you would like and save them by application and project, or share the list with other people.

Register today to benefit from all of these advantages::

- ☒ See the net price and individual discount for each product
- ☒ Inquire about availability in real time
- ☒ Simple ordering and delivery tracking
- ☒ Overview of all quotes and orders
- ☒ Create, save, and share personalized wish lists
- ☒ Direct ordering: large orders can be placed quickly
- ☒ Status of all quotes and orders: notification by e-mail in the event of status changes
- ☒ Easily reuse previous orders
- ☒ Convenient export of quotes and orders in the right format for your systems
- ☒ Management of delivery addresses

eCatalogs from SICK – always tailored to your system

The SICK eCatalogs provide a comprehensive summary of all salable products with descriptions and classifications. In the right format for your system:

Our catalog formats include BMEcat, Excel, DATANORM, and CSV

to make it easier for you to process the data in your system. Find out more about [catalog formats](#) and [classifications](#):

Catalog formats

To make it easier for you to import data into your target system, we offer formats according to the following standards: BMEcat, Excel, DATANORM, or CSV. You can either use the standard SICK eCatalog, which contains all of the product information and classifications and is provided in Excel format, or we can create an eCatalog for you so you can specify the structure you require and define your own mandatory and optional fields.

Classifications

Product data plays a central part in electronic business transactions. Classification standards make it possible to sort products by features and properties and to present them in a group structure. SICK offers classifications according to the following standards: eCl@ss, UNSPSC, ETIM, and identification according to GS1.

EDI – your interface for efficient order management

Do you require large volumes of SICK products on a regular basis?

Then why not try placing your orders via an EDI (electronic data interchange) connection? EDI enables business data to be exchanged directly between your company and SICK – efficiently and conveniently via your company software. The entire ordering process is electronic, saving you working time and process costs.

To find out how EDI can help you to work more efficiently with SICK, speak to your contact person at SICK or call 0211 5301-301..

EDI provides the following advantages for your business processes:

- ☑ Electronic ordering processes carried out directly in your company software
- ☑ Electronic data exchange reduces process costs
- ☑ No need to enter data manually for received goods or invoices
- ☑ Compatible with all standard interfaces
(e.g., EDIFACT, ODETTE, and VDA)

SICK AT A GLANCE

SICK is a leading manufacturer of intelligent sensors and sensor solutions for industrial applications. With almost 7,000 employees and over 50 subsidiaries and equity investments as well as numerous representative offices worldwide, we are always close to our customers. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in various industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services round out our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is "Sensor Intelligence."
