SAFE RADAR SYSTEM FOR HAZARDOUS AREA PROTECTION IN RAW ENVIRONMENTS

Product description

The safeRS safe radar sensor is an electro-sensitive protective device for safe personal detection with very high machine productivity. It protects stationary applications in accordance with PL d or SIL 2 in line with ISO 13849-1 and IEC 62061. The radar system consists of an evaluation unit and up to 6 sensors which enable switchover to a protected mode as soon as a person enters the

protected area. The high resistance to dirt, dust clouds, wood chips, plastic particles and sparks as well as the insensitivity to ambient light such as solar radiation or infrared waves enables reliable operation, even under the toughest ambient conditions. The safeRS stands out due to its rugged sensor housing and quick and easy commissioning.

At a glance

- Evaluation unit and up to 6 sensors
- Protective field: Scanning range up to 4 m, horizontal: 110°, vertical: 30°
