

## UE401

Evaluation unit for L4000 Systems single-beam photoelectric safety switches

**SICK**  
Sensor Intelligence.

## Technical data overview

<b>Applications</b>	Evaluation unit
<b>Compatible sensor types</b>	L4000 Systems single-beam photoelectric safety switches

## Product description

The UE401 evaluation unit safely and reliably evaluates the signals of the L4000 Systems single-beam photoelectric safety switches. It can also be used to execute the restart interlock and external device monitoring (EDM) functions.

## At a glance

- Restart interlock
- External device monitoring (EDM)
- Cascading single-beam photoelectric safety switches
- Fast response time
- Slim housing

## Your benefits

- Fast response times reduce the safety distances and save production space
- Simple configuration without additional auxiliary means, only with the help of jumpers

## Fields of application

- Access protection

## SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
