

Sensor trainings for applications and industries

Sensor knowledge for your applications

TRAINING AND EDUCATION

SICK
Sensor Intelligence.

Product description

Sensors solve the widest range of tasks in all industries. Trainings for applications and industries impart information on how sensors, sensor systems and software are combined into a solution, how they can be correctly used in the application and what has to be considered on-site. Whether trainings for selecting the right solution when planning machines and plants or seminars on industry-specific standards - the necessary sensor knowledge is available for a wide range of applications.

At a glance

- Exchange with experienced trainers, sensor experts and professionals from different sectors
- Information on the right sensor to select for specific applications
- Discussions and background information on trending topics of the industry
- Optimal way to convey knowledge with modern training methods

Your benefits

- Higher application reliability thanks to the appropriate sensor knowledge for your application or industry
- The training contents take into account the framework conditions of the respective application or industry. This is how the knowledge learned can be directly implemented in practice.
- You keep your knowledge up to date with trending topics and current information on automated Industry 4.0 related to your industry.

Short description	Training format	Class size	Duration	Type	Part no.
-	-	-	-	Safe HRC systems: Human-robot collaboration	1610760
	Workshop	-	1 d	Industry 4.0 Demonstration Factory Basics Workshop	1614374
Principle of operation of laser scanners in mobile applications (AGVs), mounting on the AGV, integration of incremental encoders and the microScan3 / nanoScan3 into the controller, programming of the microScan3 / nanoScan3, commissioning, fault diagnosis and troubleshooting	Class-room training	Maximum 8 trainees	1 d	microScan3/nanoScan3 Safety laser scanners – mobile applications	1615677

SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
