

Pre-configuration

Personalized SICK products for easy commissioning

SMART SERVICES

SICK
Sensor Intelligence.

Advantages

Individuality has never been so easy

Retrieval is quick and simple at any time

Your device configuration is saved in SICK AssetHub. This makes it possible to implement product configurations for batch size 1 production. These configurations can also be transferred to other devices and used there quickly and easily.

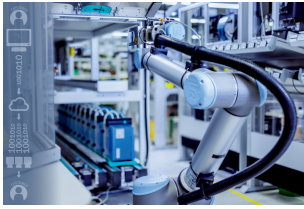

plug-and-play

Software-based pre-configuration of the devices means you do not have to set parameters. You can easily put your devices into operation yourself.

Configure you device individually so it is ready for operation in no time. This saves you time and money during commissioning and ensures high availability of your system.

Product description

The pre-configuration service from SICK enables the production and delivery of customer-specific SICK products. The individual device configuration (SOPAS ET device setting) is uploaded to sick.com when ordering and stored individually in the SICK product during the production process. Pre-configuration is therefore a software-based adaptation of the serial product. The result is a plug and play-capable device with consistently high commissioning quality for recurring applications. The quick and easy commissioning decreases effort and costs. SICK saves and archives the product configuration, therefore simplifying reorder.

At a glance

- Flexible and individualized production and delivery of SICK products with adapted software
- Plug and play commissioning
- Consistent commissioning quality for recurring applications
- Saving and archiving of the configuration
- Configuration management via AssetHub
- Unique configuration ID and description
- Batch size 1

Your benefits

- Low effort and quick availability of the system due to plug and play commissioning of the SICK product
- Quick and easy availability of customer-specific SICK products down the smallest batch size of 1
- Fewer follow-on errors and production failures due to consistently high commissioning quality
- Efficient resource use due to multiplication of SICK product configurations created one time
- Simple and customer-specific reorder due to unique configuration ID and individual part number
- Convenient documentation and management of the product configuration in the SICK AssetHub

Ordering information

Additional services → www.sick.com/Pre-configuration

- **Voraussetzungen:** SOPAS ET file or sensor app which contains the necessary configuration and is coordinated to the customer application, Uploading of the configuration or the SOPAS ET file or sensor app
- **Range of services:** Production and delivery of one or several personalized SICK products with the configuration uploaded by the customer and selected in the web ordering process
- **Documentation:** Additional label on the SICK product and its packaging with the configuration name specified by the customer and a unique configuration ID
- **Duration:** The delivery time of the pre-configured and customer-specific SICK product is identical, or in the case of temporary storage, a few days longer than with a standard SICK product

Product area	Type	Part no.
AS30	Pre-configuration AS30	1615149
Dx35	Pre-configuration Dx35	1612236
OLS	Pre-configuration OLS20	1615148

SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
