

ICR89x System

Efficient sorting of objects at the highest conveyor speeds

TRACK AND TRACE SYSTEMS

SICK
Sensor Intelligence.

Technical data overview

Minimum object distance	≥ 50 mm
Read field width	1,200 mm

Product description

The ICR System (image-based code reader) Track and trace system is the ideal identification solution for sorting processes at the highest conveyor speeds. The cubic and irregular shipping objects to be sorted are quickly and reliably identified while all common 1D/2D codes as well as postal codes are taken into account. The excellent image quality of the integrated camera also enables use in OCR, video coding and vision applications. The system can be used for thin conveyor widths as well as for widths of up to 1,600 mm and can be expanded to include products such as a volume measurement system.

At a glance

- 8/12 k quad-line sensor
- Linux-based software platform
- Ethernet-based code data transmission to the SIM2000 controller
- Integrated computing power to support the latest vision applications
- MTBF 120,000 h

Your benefits

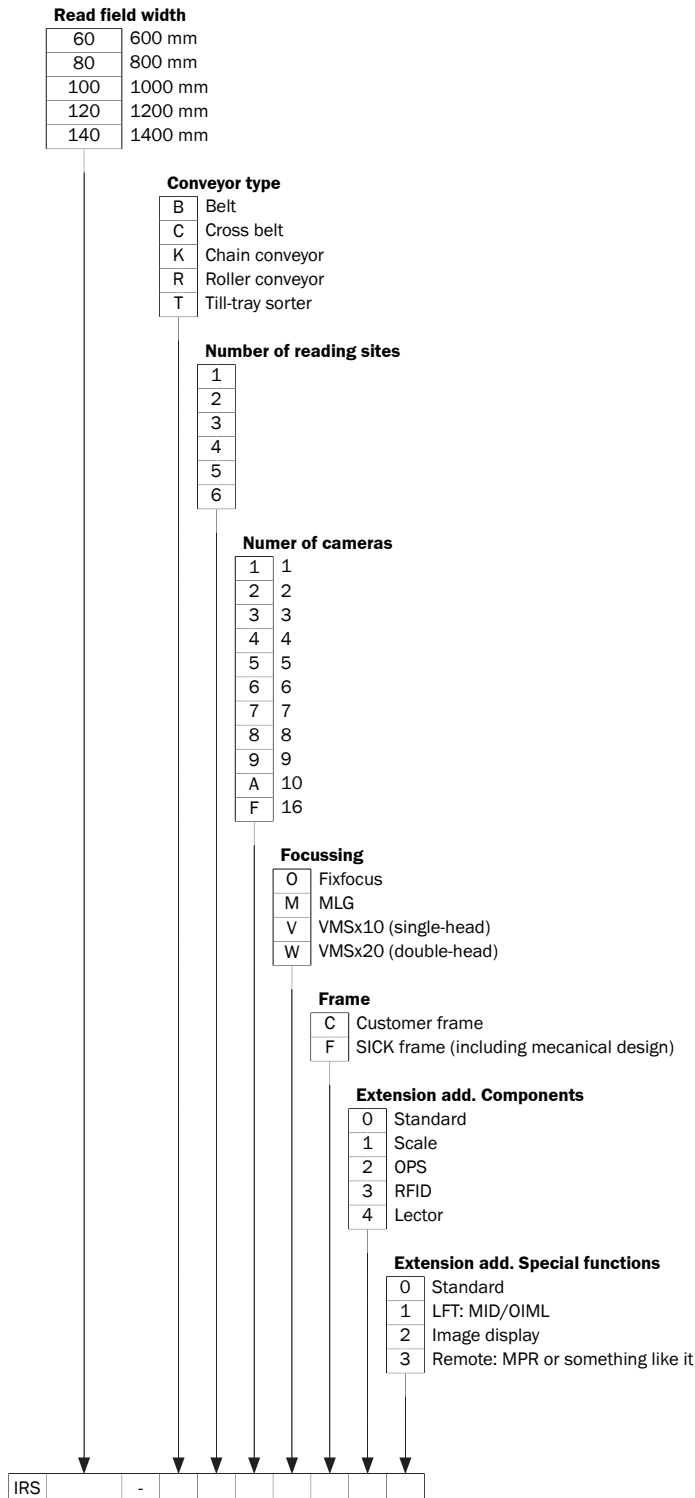

- Throughput of more than 18,000 objects/h at conveyor speeds of up to 4.5 m/s
- Conveyor belt widths of up to 1,600 mm are covered
- High-resolution image quality (200 dpi) for the best read rates, OCR results, video coding and vision applications
- Completely integrated code reading and vision solutions without requiring an additional PC/server
- Monitoring option thanks to decentralized image archiving
- Reduced shadow effects and minimal system footprint thanks to the 55° camera skew angle
- Simplified and cost-efficient cabling due to Ethernet line network topology

Fields of application

- Challenging code reading for optimizing sorting processes in the fields of transport and logistics
- Image acquisition and storage for OCR, video coding, archiving and vision applications

- **Product family group:** Track and trace systems

Type	Part no.
System type IRS120-x11xxxx	On request
System type IRS120-x53xxxx	On request
System type IRS120-x55xxxx	On request

SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
