Monitoring Services

Product description

With its monitoring services, SICK is offering a remote service for monitoring sensors and analyzers installed at customer sites. Service experts from SICK assume the remote monitoring of devices using sensor-specific monitoring apps. Trend detection and prediction models are integrated into these: Both identify device faults and abnormalities at an early stage so that appropriate measures can be taken to rectify them. The timing of device maintenance can be determined based on data and optimized according to the condition. In the event of device faults and abnormalities, the customer receives an initial diagnosis including recommendations for action. Regular reports inform customers about device status and events that occur during device monitoring.

At a glance

- Continuous remote condition monitoring of customer devices by SICK
- Notification before problems occur, including initial diagnosis and recommendations for action
- Regular reports on the condition of SICK devices including data evaluation
- Quick problem analysis by service experts from SICK

Your benefits

- High device availability through early detection of unplanned downtime
- Less downtime thanks to proactive device monitoring by SICK
- Highly qualified device analysis by specialized staff
- Quick response time thanks to automatic alarm management
- Cost efficiency by extending the device service life

SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is "Sensor Intelligence."
