Logistic Technology Center test day
CONSULTING AND DESIGN

Product description

There is not always a cost-effective way to test a new application at the customer's site under real conditions. That is why SICK offers the services of its internal Logistics Technology Center (LTC) as a means of evaluating customer applications. At the center, experienced engineers can test customer applications in a fully equipped test environment and evaluate their feasibility in detail. The resulting application reports and other recommendations on how to solve the specific application requirements ensure the application can be subsequently implemented under real conditions faster and for less money.

At a glance

- Customer applications tested at the fully equipped test center
- Experienced engineers provide advice and recommendations on how to solve the application
- A detailed application report is produced

Your benefits

- Saves time and money: Tests ensure the application is feasible right from the start
- Detailed documentation: Experienced engineers provide detailed recommendations on how to solve the application
- Individuality: Customers actively define the application conditions based on their own requirements

SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is "Sensor Intelligence."
