

Asset Monitoring System

Reliable detection of re-use cycles and product variants

QUALITY CONTROL SYSTEMS

SICK
Sensor Intelligence.

Product description

The Asset Monitoring System quality control system reads codes in order to collect detailed information regarding the use of equipment or the number of product variants manufactured on a production line. This enables the plant operator to keep track of equipment that is wearing out or the quantity of manufactured product variants at all times. As an easy-to-integrate stand-alone solution, the system is especially suited for retrofitting into existing plants. The modular design with code readers from the Lector6xx product family means the system can be used in all kinds of applications.

At a glance

- Code reading to collect production data during operation
- Data export via configurable FTP connection
- Intuitive operation via HMI with touchscreen
- Easy-to-integrate stand-alone solution
- Display of live image and reading statistics

Your benefits

- Quality assurance through the evaluation of detailed equipment usage data
- Low overall costs thanks to simple installation and operation
- Trouble-free retrofitting of existing plants thanks to stand-alone solution
- Easy access to data thanks to automated export function

Fields of application

- Consumer goods industry
- Food and beverage industry
- Construction materials industry

SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
