

Filling level monitoring

Efficient material replenishment thanks to early notification on mobile devices

DIGITAL SOLUTIONS FOR INTEGRATION

SICK
Sensor Intelligence.

Advantages

The cloud-based dashboard keeps you informed of all levels at all times, maximizing the total operating time of your machines.

As a machine operator, you are automatically notified of critical levels, for example by a smartwatch.

Product description

The Filling Level Monitoring Digital Solution for Integration sends notifications to mobile devices as soon as levels fall below limit values. Notification is automatic and is accompanied by an acoustic signal and vibration. This ensures that material is refilled on time and downtime is avoided. Machine staff no longer has to check fill levels manually, making production processes more efficient. Thanks to this technology, work interruptions are also a thing of the past. The cloud-based dashboard provides an overview of all levels at all times.

At a glance

- Would you like your levels to be monitored automatically?
- Would you like to avoid machine downtime due to a lack of material supply?
- Would you like to make walking routes more efficient for your employees?
- Would you like to improve your production processes?

Your benefits

- Cost savings thanks to efficient material supply
- Increased total machine uptime due to early material replenishment
- Relief of machine staff through automatic level monitoring
- Transparent level monitoring at all times thanks to cloud-based dashboard
- More efficient planning of operational work steps thanks to transparent level monitoring

Fields of application

- Level monitoring and notification in all sectors and areas of material supply

Description	Type	Part no.
-	DT35-B15251	1057652
-	SIM1012-OP0G200	1098146
As a component of the Digital Solution Filling Level Monitoring, the Digital Service Filling Level Monitoring enables automatic filling level monitoring and notifications when critical conditions are reached.	Filling Level Monitoring	On request
SICK LiveConnect is the standard for live data connections from sensor to cloud and offers an easy and secure way to bring sensor data online	SICK LiveConnect	On request

SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
