

# SICK AssetHub

Manage your digital twins

**DIGITAL SERVICES FOR INTEGRATION**

**SICK**  
Sensor Intelligence.

### Technical data overview

<b>Language</b>	German English
<b>Supported products</b>	All, regardless of the manufacturer
<b>Supported end devices</b>	Tablet, PC

### Product description

SICK AssetHub is a digital service which can be used to manage the digital twins of all devices or systems of a company, regardless of the manufacturer. The digital service enables an interactive overview of these assets, creating transparency. It also provides important information and documents throughout the life cycle of all assets. The clear tree structure of the technical locations makes management simple. SICK AssetHub provides the necessary foundation for any I4.0 strategy and is a flexible basis which can be extended with modules. It can be used for other asset-centered digital services from SICK, such as SICK LiveConnect, SICK Monitoring Box or SICK ServiceModule. SICK AssetHub is an EAM (Enterprise Asset Management) system and is part of IntegrationSpace®.

### At a glance

- Simple generation of digital twins
- Technical locations in clear tree structures
- Each type of asset can be illustrated with different structural elements
- Rights management for collaborative work
- Additional information available for all SICK devices
- History and transparency of digital interactions

### Your benefits

- Complete transparency of all your assets
- Ensure the efficiency and productivity of your company
- All asset-related data can be found easily in one place
- Manage devices regardless of manufacturer
- Any system or factory, any type of machine, production facility, industrial plant or operating facility can be mapped
- Easy device registration via smartphone app or web front-end

### Fields of application

- For recording, identifying and inventorying assets
- Areas in which assets contribute to value creation
- Industries in which verification of service, maintenance or certification of assets are required
- Anywhere there is statistical or dynamic asset-related data which must be structured

## SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
