

M4000 Standard A/P

Intelligent wiring and maximum availability

SICK
Sensor Intelligence.

Technical data overview

Safety level	PL e, SIL 3, Type 4
Scanning range	7.5 m / 4.5 m (depending on type)
Number of beams	2 / 4 (depending on type)
Beam separation	500 mm / 300 mm (depending on type)
End cap with integrated LED	- / ✓ (depending on type)
Enclosure rating	IP65
Ambient operating temperature	-30 °C ... +55 °C

Product description

The M4000 Standard A/P multiple light beam safety device is the economical solution for access protection. It is particularly economical since only the active side must be wired, which reduces the installation time. The M4000's large scanning range and extensive functions provide efficient access protection and maximum reliability. The functions are easy to understand and are set via the configuration keys located directly on the device. Integrated functions and status information enable quick commissioning and minimize machine downtime. The modular concept enables a high level of machine safety since device properties can be adapted to meet specific application requirements. In addition, sens:Control devices, accessories, and services complete the product offering and form packaged solutions designed specifically for industrial environments.

At a glance

- Type 4 (IEC 61496), SIL3 (IEC 61508), PL e (EN ISO 13849)
- Sender/receiver in a single housing, scanning range up to 7.5 m
- External device monitoring (EDM), restart interlock and application diagnostic output
- Standardized M12 connectivity
- 7-segment display
- Configuration keys for setting directly on the device
- Beam coding for correct system allocation
- Optional integrated: LED, Actuator Sensor Interface

Your benefits

- Economical active/passive variants minimize the wiring and installation workload.
- Resilient and rugged design for high system throughput, even under special ambient conditions
- Mounting grooves on three housing sides ensure greater mounting flexibility and facilitate integration with the machine
- User-friendly interfaces and status indicators simplify commissioning and maintenance
- Fast startup times due to configuration directly on the device, without the need for a PC
- Reduced downtimes thanks to all-around-visible LEDs and diagnostics displays

Fields of application

- Access protection
- Machine tool
- Automotive industry, robotics, and automatic machining centers
- Storage and conveyor, packaging machinery, palletizer systems and stackers
- Wood machining, large weaving machines, and stone setting systems

SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
