

## Machine safety rating

For the efficient prioritization of safety-related modernization measures

CONSULTING AND DESIGN

**SICK**  
Sensor Intelligence.

## Product description

Maintaining an overview of the safety of a production plant with numerous machines is a challenge that should not be underestimated. Recognizing which machines can continue to be operated safely and where urgent need for action exists requires time and expert knowledge. The SICK safety experts create a comprehensive overview of the relevant machines and evaluate their safety-related condition based on defined criteria. This report will help you prioritize the necessary safety-related modernization measures. It also forms the basis for an initial cost estimate.

## At a glance

- Safety-related evaluation of production plants
- Summary of the biggest safety deficits on individual machines
- Support in prioritizing safety-related modernization measures based on the machines and measures
- Assistance with estimating the budget for safety-related retrofitting measures

## Your benefits

- You receive an informative report of the safety-related condition of your machines
- You can efficiently prioritize and plan your modernization measures based on the classification
- You benefit from standardized procedures and defined processes that ensure efficient validations of uniform quality worldwide
- Trust in the safety-related experience of the SICK safety experts. This is how you save valuable time and resources and can focus on your core business

Industrial Safety	Operation	Evaluation of the existing machinery (in a plant, hall or area), Safety-related evaluation of the machines based on clearly defined criteria, Summary of the biggest safety deficits on individual machines, Suggestions for immediate measures (if required), Assistance with estimating the budget for safety-related retrofitting measures	Machine safety rating	1616496

## SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
