

Person Specification for:

Project Engineer- Systems Plus

Created: 12.01.2018. Reviewed: 26.02.2018; 21.01.2020

SICK (UK) LTD, a market leader in industrial sensor technology for Factory and Logistics Automation, endeavour to provide excellent customer service in all areas.

In order to support the Systems Plus Sales and Support teams the company is looking to recruit a Project Engineer to join the Project team who deals with onsite pre/post sales and project support - e. g. installation, commissioning - for Auto Ident and Vision products.

Key Attributes & Qualifications

- minimum of BTEC in Electrical & Electronic Engineering or similar
- able to operate in a sales and support environment and communicate at all levels of business
- good communication skills are essential
- self motivated and a strategic thinker with a will to get the job done
- experience in customer project work
- experience in PLC and controls
- general IT network communication
- experience in Auto Ident or Vision applications in the UK (preferred, but not essential)

The candidate will

- be comfortable working in a customer environment
- be able to work on their own as well as part of a team
- have a good basic technical background and skills
- have a hands-on approach
- have a good understanding of general IT equipment including general PC skills
- have a full UK driving licence
- be able to travel in - and occasionally outside – the UK and stay away overnight
- be flexible with working hours
- demonstrate a willingness to learn and develop

Opportunities to develop their careers are in the candidate' hands – success in this position will allow the business to expand bringing greater responsibility to the role.
